**L'arte Italiana del Tessuto
si vede e si percepisce**

L'arte del tessere e del filare è tanto antica quanto la civiltà umana. I tessuti rappresentano "il filo della storia" perché sono strettamente alacciati alla vita impercettibili costumi sulle vestimenta, i gusti, gli usi, le mode e le culture di un determinato periodo storico. L'arte del tessile ha in effetti molte storie da raccontare e da vivere.

**The Italian
you can see**

The art of weaving is as old as human. The fabrics represent because they are tied to the truth and to the important values of a culture, customs, faith of a specific historical period. The textile art has in fact many stories to tell.
